Compatibilità con adattatori NTM / Compatybility with NTM adapters

(IT) La NTM Spa produce una vasta gamma di collettori atti a soddisfare ogni esigenza di distribuzione e regolazione dei liquidi. Tutti i collettori prodotti sono utilizzabili per tutti i tubi esistenti a mezzo di speciali adattatori come da allegata tabella. I collettori complanari sono assemblabili in maniera multipla tale da assicurare tutte le uscite (caldo/freddo - andata/ritorno) necessarie. L'operazione di assemblaggio si ottiene mediante serraggio di una vite tra i collettori stessi mentre la tenuta è assicurata da due o-rings alloggiati in apposita sede per la conseguente compressione (art. 667 e 668). I collettori lineari sono assemblabili a mezzo filetti maschio e femmina a norma EN 10226-1 ISO 7 e quindi di facile tenuta senza l'ausilio di mezzi ausiliari (canapa ecc.).

(GB) NTM SPA produce a very big range of manifolds suitable to every needs for fluid distribution and regulation. Using special adapters all the manifolds produced are suitable for all the existing pipes as the following table shows. Complanar manifolds can be assembled multiple in such way all the exits (cold/hot-go/back) are assured.

The assembling operation is obtained by tighting a screw between the manifolds themselves while the hydraulic waterproof is guaranteed from two o-ring put on appropriate groove for compression. (art. 667-668).

Linear manifold are assembled by male and female thread made according to EN 10226-1 ISO 7 norm so the hydraulic waterproof is made without insulator (hemp etc.).
